

Events 2005-06

From the Desk of Chairman

Dear Parents,
Paavai Greetings you.

With the annual day celebrations just round the corner, let me once again meet you through this News Letter 2006 with much renewed hopes and vigour. Paavai has always with her, three magic keys the will to win, the desire to succeed and the urge to reach her full potential and which always help her to unlock the doors unopened towards the excellence.

In the changing environment, technical education system plays a vital role in the socio-economic and political map of the country. In order to meet the challenges of globalization many of the industries had to gear themselves in reconstructing their process. We know that we are in fierce competition, employability of pass outs cannot be enhanced unless they are provided with quality education. Quality imperatives which motivate the educational institution to take up a proactive stance when facing challenges are, first moral imperative which deals with students, parents community etc; second professional imperative that deals with the professional role of educators; third the competitive imperative which speaks the link with competitors both internally and globally and fourth accountability imperative which demonstrates high standard of the products such as curriculum, learning process, quality pass-outs and so on. Paavai, right from the inception, is trying to focus this particular area and that is why she could continuously produce value based engineers and not mere engineering graduates, to suit the exact requirement of the industry.

Further, it is a great testimony of the faith and creditability, the parents, students and society had reposed on us during the past five years. This faith and confidence they have had on Paavai, therefore warrants commitment in our educational systems, adherence to ethical standards and continuous capacity building. Paavi has fundamental role and responsibilities in shaping the individuals into great engineers, the most expected citizens of India by firmly accepting the following challenges.

- Promoting the highest ethical standards in education
- Ensuing an authentic and complete teaching which makes the individual to be an employable professional
- Contributing to the country high potential engineers globally competent thus ushering in an era of prosperity, enhanced employability and ever longing trust.
- Developing strong institute-industry relationship/alliance towards synergising the professional and academic expertise ultimately leading to successful real time application resulting in high materialistic returns.

In this juncture, Paavai will ever remember that industry and academia cannot grow and develop in isolation and the efforts should be chained to bridge the industry institution-gap.

India is leaping forward and making great strides in manufacturing, software development, ITES, Biotech and Parma, Massive FDI inflow, stock market boom, buoyant employment demands new techniques and skills from engineers. Current year at the helm of affairs of Paavai is indeed demanding, challenging but rewarding. Guest Lectures on contemporary topics in all branches, technical symposiums, residential leadership trainings both for teachers and students thus affirming our strength to Himalayas. To serve the society as a responsible educational institution, it is a great opportunity to always interact with the best of minds across the terrains.

Without the goodwill and co-operation of staff, parents and students, no institution can succeed. We are very fortunate to have them all in full measure. Various guests we invited, resource persons who made all our events very colourful and successful deserve our special thanks. I shall always record my appreciation for the commitment and hard work of my staff team to make things always happen.

Finally being the end of this academic year, I should remind the golden words of Jacob Riis "When nothing seems to help, I go on and look at a stone cutter hammering away at his rock perhaps a hundred times without as much as a crack showing in it. Yet at the hundred and first blow, it will split in to two, and I know it was not that blow did it but all that had gone before".

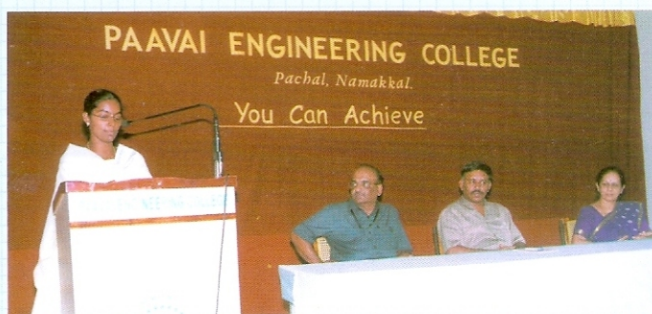

I once again wish to recall the fact that even after transformation what we do today is a progression from the past, and is integrated very well with our history. It is a sign of the health and the inherent strength of our organization.

I draw your attention to the following a few pages on which we portrayed some of the events we had during the academic year 2005-06...

Anna University Vice Chancellor Dr. Viswanathan issues offer of employment in Cognizant Tech. Solution to one of our students.

Vision of Paavai is designed by the Management and inturn our Staff Team has given their mission. Undoubtedly we will reach our vision with the sincere efforts put forth by the members of our Paavai family with due empathy.

Dear Parents you may be confident that our students will one day become World-class leaders in business, industry, employment and all their endeavors, in many regions of the world. But the path that stretches to the future will not be without challenges. We make them to be fuelled by patient and burning desire to be successful will lead them to their goals achieved.

Finally the youthful enthusiasm of our students can be expressed in the words of wisdom by Eleanor Roosevelt "the future belongs to those who believe in the beauty of their dreams".

In this competitive global environment only the tough can get going, sounds clicked but so true! Dreams coupled with a fire in their hearts to achieve can lead them to their cherished careers.

At Paavai we will always shape their dreams and aspirations and endeavors to provide the platform to climb the ladder of success.

திறன்மிக்குந்த, வளம் நிறைந்த, உயர் தொழில்நுட்ப இந்தியாவை உருவாக்கிட அரும்பணியாற்றிடுவதே எமது லட்சியம். உங்கள் தொடர் ஆசிகளும், வழிகாட்டுதல்களும் எங்களை நிச்சயம் வென்றிடச்செய்யும். ஜெய்ஹிந்த்.

With Kind regards, எக்ஸ்சுதரம் சிங்ஹ்,
