To

The Head KTMD,
CSIR-National Aerospace Laboratories (NAL)
HAL Airport Road,
Bangalore 560 017, India.

Dear Sir,

Sub: Student visit at NAL- Permission requested - Reg.

****

Paavai Engineering College is a premier Autonomous Educational Institute affiliated to Anna University, Chennai and located in Pachal, Namakkal district, Tamilnadu-637018. Our Institute had NAAC-Accredited with a CGPA 3.14 on a four point scale at 'A' Grade and recognized under section 2 (f) of the UGC Act, 1956.The AICTE- CII ranked the institution with "Platinum" status (2017-18) and received the prestigious award of "Most Innovative College Award-South Zone" organized by AICTE and Internshala at the AICTE Office, New Delhi

The Department of Aeronautical Engineering offers a four year undergraduate program (B.E) in Aeronautical Engineering from the year of 2015. The department has a team of highly qualified, dedicated and motivated faculty members who are graduated from reputed institutions. The department has generated better learning atmosphere through well-equipped laboratories and classrooms with multimedia facilities and a dedicated department library, In addition to Institute's central library.

We arrange regular industrial visits to our students to understand the real life applications of the aeronautical and allied subjects. Our students are planning to Visit your esteemed organization in the month of August, 2019 according to your convenient dates (positively on **19th August 2019**). Around 50 students are interested and they will be accompanied by 4 faculty Members.

In this regard, we request you to kindly grant permission for our students and staffs to visit your organization, we looking forward to your positive reply.

Thanking you,

PAAVAI ENGINEERING COLLEGE PACHAL P.O. NAMAKKAL D.T.

Dear Sir/Madam,

Sub: Visit of BE(Aero) **students on 19-08-19**

Ref: your letter mail dt **02-08-2019**

This has reference to the letter/mail dated **02-08-2019**. We will be happy to organize a visit for your students and faculties to National Aerospace Laboratories, Bangalore on **19-08-2019** from **09.00 am to 12.00 noon.** Kindly note the following:- There may be lot of traffic problems on the way to NAL, kindly ensure enough buffer time to be 15 minutes to reach before the appointed time to enable us to conduct the programme as per the schedule For Security reasons electronics items, cell phones, cameras, laptops etc. are prohibited inside the campus. **Kindly send us the names of students and faculties who will be visiting, for arranging security clearance. Kindly note that foreigners are not permitted for the visit.** All students and faculties are requested to carry their ID cards. Also **one of the faculty is requested to carry a valid ID proof like aadhar** or driving licence etc. Kindly give the **cell number of the contact person** who will be accompanying the students, for coordinating purposes.

Kindly report to our reception at our Main campus (kodihalli campus) which is located on the old airport road opposite to Manipal hospital and adjacent to Leela Palace hotel(google map location see for Leela Palace Hotel). **Never see the google map for route for NAL as it will show the other campus which is 5 kms away. Kindly ensure that the students have their breakfast/lunch and brought for the visit or else they feel tired/ sick and may not be able to concentrate on the visit. Kindly note that no agents are involved in organizing the visits and no fee is charged for the visits. Since we are located in 2 different places separated by a distance of 5 kms, you are requested to make transport arrangement to visit both places without which it is not possible to visit various important facilities. Due to unforeseen reasons visit may be cancelled in the last minute and hence requested to reconfirm the visit on the prior to the day visit. Students below the age of 12 will not be permitted. Since the vehicles are not permitted inside the campus and also there are lot of walking to be done it may be difficult for physically challenged persons. Kindly inform the concerned co-ordinator to get in touch with me at the time of starting from the college for co-ordination purpose.**

With kind regards,

(A.SOMANARAYANAN)

PANTECH

In 1998 with an objective of offering advanced technological solutions in the fields of Information Technology (IT) and Information Technology Enabled services (ITES). In July 2006, PANTECH became the first Private-Sector IT Park in Kerala. With the State-of-the-Art building of 55,000 sq. ft., sophisticated technical infrastructure and more than 400 professionals, PANTECH is now the front-line service provider in IT infrastructure services industry, catering to both domestic and international clients.

There are a host of services PANTECH offer including Software Development, Web Designing/Development, Domain Registration, Web Hosting, Server Administration(Windows/Linux), Voice Technical Support, Remote Server Administration, Server Co-location, Search Engine Optimization, Medical Transcription and E-Commerce solutions. Being a steadfastly growing organization, PANTECH is also creating employment potential in different spheres for a large pool of educated youth; both freshers and experienced professionals in the state of Kerala.

At PANTECH, we are striving to understand the changing customer needs and stay in-line with the increasing demands of the industry. By constantly upgrading the quality of our processes, we simply customize the technology readily usable to the clients. PANTECH is proud of our solid team of Information Systems professionals, including those trained abroad, who study, design, develop, enhance, customize, implement, maintain and support various aspects of IT products and services. For all the overseas business ventures, especially the North American clients, we work in close association with our business partner, M/S PANTECH Software Solutions Inc., New York, USA.

Mission

We are committed towards providing ever-increasing level of customer satisfaction by offering the highest quality in; Software and Web development, IT enabled services, HBPO services, E-Commerce solutions, Search Engine Optimization and Web Application services.

Vision

Being a global brand, to make a difference in client perception about service quality.
Being a great place to work where people are inspired by the best they can avail.
Bringing forth to the new world of IT & IT-Enabled Services.
Maintaining a great work culture of mutual respect and team rapport for maximized productivity and quality.

Being in the Information Technology industry for more than a decade and a half, PANTECH can now provide reliable, top-notch solutions within the shortest possible turn-around time. Apart from our technological supremacy, the thrive to succeed and the service of our dedicated experts have made PANTECH climb the ladder of success and earn laurels in such a short span of time.

PANTECH is continuing its voyage of success....

Come..... Join us, and be a part of this winning journey....

Permission for iv

Actions

Dear Sir,

As you may be aware, [illegible] COLLEGE is one of the most reputed Engineering Institutions in Tamil Nadu and known for its excellent record in academics and co-curricular activities. The College offers Bachelor degree course in ECE, CSE, Aero, IT, Mech. The state of the art facilities and competent faculty provide an excellent climate for the all round development of the students.

As a part of the curriculum, the students are required to undertake Industrial Visits to a few Industries of repute. We feel it will be fruitful that the students with academic background have a glimpse of the industry in order to have a better appreciation of practical applications of theory.

In the above background, we would like to send a batch of about students of COMPUTER SCIENCE AND ENGINEERING, Branch of 2ND year accompanied by two staff members to visit your esteemed industry preferably on 07/09/2015 and 08/09/2015.

I request you, to kindly accord the necessary permission for the above visit and arrange for guiding the students.

We ensure you that our students will observe the rules and regulations that are prescribed by your company for the visitors and will in no way disturb the functioning of the company during their visit.

We shall be grateful for a favorable response.

Thanking You,

LAVA

COMPANY DETAILS

Aspire Communications:

ASPIRE PR & Strategies Pvt. Ltd., leading in forte communications and empirical network is Pune's leading Public Relations agencies today. Established in 2004, with over a decade in business, we provide services like Public Relations, Digital Social Media, Corporate Social Responsibility Consulting, Image Consulting, Celebrity Management, Movie Promotions and Media Relations. We at ASPIRE PR & Strategies Pvt. Ltd. cater to business verticals like retail, health care, hospitality, IT, education, banks, real estate, infrastructure organizations, governments, semi – government organizations, non – profit organizations that form the rich clientele list. We obligate to our clients for deliberate communications assignments, endorsing the agency's reputation as one of Pune's leading forte communications firms.

Pune, where our head office is situated is an emerging city and a dynamic expanse profuse with prospective. To recognize, communicate and connect with its multi-cultural and multi-lingual audience can be pretty much formidable until you get in touch with us at ASPIRE PR & Strategies Pvt. Ltd., we have a native and immaculate comprehension of the city, its inclinations and requirements. Fortified by a unified cohesive network and solid associations with the chief influencers and cross-media platforms, ASPIRE PR & Strategies Pvt. Ltd. can best deliver Pune across Pune and our other branches at Nagpur, Nasik, Aurangabad, Kolhapur.

Confronted with a traditionally assorted audience with random demographics, you need a singular entity that can go beyond generalizations to work in the restraints and nuances that makes strategies and approaches precise for a result-oriented response from your target audience.

A multi-national corporate giant, an upcoming cultural icon, an energetic start-up, a visiting sports team a pan-regional notion campaign - every client needs us to talk to different audiences. ASPIRE PR & Strategies Pvt. Ltd. services are varied tools, incorporated by a particular emphasis on your specific requirements to create a unique strategy. At ASPIRE PR & Strategies Pvt. Ltd., we consider that Public Relations is a superlative technique to create awareness about your own company and that to strengthen its reputation.

Thus our key focus areas are

- Educating the masses/ building awareness
- Image building
- All features of peripheral and internal communications
- Editorial and media relation campaign including press conference, press release, interviews, syndicated articles
- Brand Building through media, non-media events, through product introductions, conference, workshops, product profiling

OUR FORTES

- A comprehensive understanding of the industry and aptitude to endorse inventive, cost-effective approaches
- Media sustenance owed to close rapports with them across the country
- Prompt results
- Aptitude and assurance to meet targets
- Countrywide reach through a network of acquaintances

OUR SERVICES

Media Relations

- Organise Press Conference
- Press release dissemination
- One on one interview
- Select Press brief

Corporate Management

- HR related features/stories
- Newly introduced products/services
- Appointments /recruitments among the leadership team of the company
- MoU announcement /Acquisitions/Brand building

Brand Management

- Product launch
- Name change
- Logo change

6) Attendance during Training	:	**REGULAR**

P.Rajendran
Deputy Manager – Training
Southern Petrochemical Industries Corporation Limited

SPIC

Date: 17th May 2019

CERTIFICATE

This is to certify that **Mr. S. Gowthamaprabhakaran** Second Year. **B.Tech – Chemical Engineering** student of Paavai Engineering College at Namakkal has undergone In-plant Training in **M/s. - Southern Petrochemical Industries Corporation Limited**. SPIC Nagar, Tuticorin.

Internship Training details are as furnished below:

1) Type of Training Imparted	:	**IN-PLANT TRAINING**
2) Period of Institutional Training	:	**13th May 2019 to 17th May 2019**
3) Allotment of Department	:	**ALF3**
4) Conduct & Character	:	**GOOD**
5) Performance during Training	:	**GOOD**
6) Attendance during Training	:	**REGULAR**

P.Rajendran
Deputy Manager – Training
Southern Petrochemical Industries Corporation Limited

INTERNSHALA TRAININGS

CERTIFICATE OF TRAINING

Ethical Hacking

Vignesh J from **Paavai Engineering College(Autonomous)** has successfully undergone a six weeks online summer training on Ethical Hacking. In the training, Vignesh learned Basics of Information Security, Computer Networking and Web Development, Information Gathering and VAPT of some important vulnerabilities in the OWASP top 10, Automating VAPT, and Documenting and Reporting Vulnerabilities. The training lasted for six weeks from 1st June, 2019 to 13th July, 2019.

In the final assessment at the completion of the training program, Vignesh scored 44% marks.

We wish Vignesh all the best for future endeavours.

Sarvesh Agrawal

Founder & CEO

STUDY ON LUNAR MARE ORIENTALE'S IL'IN CRATER USING EMPIRICAL REMOTE SENSING AND FUZZY LOGIC TECHNIQUES: A CASE STUDY OF PLANETARY EXPLORATION.

ABSTRACT

For exploring the planetary bodies and associated are being used to study through the remote sensing along with some principles and applications. In this project we use Remote sensing technique for planetary exploration. Remote sensing is a technique to study information about an object or phenomenon without a physical contact with an object. The advantages of the remote sensing. It is used to collect data very easy as variety of bands for space exploration. The purpose of remote sensing for mineral exploration, lithological mapping, surficial deposit, structural mapping, environmental geology, event mapping and monitoring, planetary mapping etc., In the present study, the PCA and Fuzzy logic methods have been used to study the surface characters and their depositions of the Mare Orientale Basin of Il'in crater in the lunar region, it was first fully described by the German Astronomer Julius Franz (The Moon) in 1906, and has named the mare as "Eastern sea", it is a multi-ringed crater, the inner and outer Montes Rook and the outermost ring are the Montes located on the western border of the Cordillera, it is located near side and far side of the moon with coordinates of 19.4ºS 92.8ºW, mapping of crater such as diameter, area, composition, depth of the basin, it resembles as target ring bulls eye. The main purpose of the study is to monitor and gather information of recieving data from range of surface materials by the method of Principal component analysis and band ratio the satellite images for the clear view of surface materials, it has done by image processing of PCA in Envi and the output band ratio images classified using fuzzy logic method for range of surface materials by matlab.

Keywords or phrases: Remote sensing, Il'in crater, Principal component Analysis, surface materials, Mare Orientale basin, fuzzy logic.

1. INTRODUCTION

Mare orientale basin is one of the remarkable feature basin compared to the other basins on the Moon. The German Astronomer Julius Franz who named the mare as eastern sea. It is located in the Moon's southwestern limb between boundary of far and nearside, left-hand edge as seen from the Earth and superlative example for the preserved "multi-ring basin" on the Moon. In this lunar surface the basin is fairly flooded with the mare deposits. The lunar has formed basins like Orientale which plays an important in the early history of moon. Since they were extremely disruptive, has confronted altering events that caused substantial fracturing, melting and end formation of mare deposits in the crust. In base of topography analysis should be followed as in part of determine characteristics such as dimensions of the basin, with multi ring formation of crater. The Orientale basin has 930 km in a diameter and covers an area of 700, 0000 km^2 *[Head 1974; Whitten et al., 2011]*, the earlier studies says that the thickness of the mare was less than 1– 2 km *[Head 1974; Solomon and Head 1980]* and *[Greeley, (1976) and Scott et al., (1977)]* highlighted that the mare thickness could be up to 1km. The recent LRO wide-angle Camera (LROC), the depth of the Maunder crater situated in the Mare Orientale is estimated as 6.04 km. Orientale consists of five mare ponds, the largest of which covers an area of 8,890 km^2 and the smallest of which is 145 km. The North lengthened flat extent is a Lacus Veris it is also known as spring lake. The Researchers examined that this orientale basin is formed due to impact of meteorite about 3.8 billion years. The properties are compositional variation of surface materials to study about the characteristics of the surface materials present in the Il'in crater filled with mare, the large impact events produce copious volumes of shock melted, liquid rock, most of which lines of transient crater and floor deposit of the crater and through these study will able to study in which form we will get the input *[Howard and Wilshire, (1975); Grieve et al., (1977); Cintala and Grieve, (1998)]*. Through image processing we can identify the types of minerals in the lunar crater by using Matlab and Envi. In connection with that, the present study is aiming to investigate from the M^3 satellite image the topography characters of the basin (depth, diameter, and area).

2. Study Area

The study area is Mare Orientale basin it is one of the oldest basin formed in lunar surface due to impact of meteorite. By this impact the events produce as shock melted, liquid rock, floor deposit of the crater and collision caused ripples in the crust, which results in the formation of circular Multi Ring features it resembles as a target ring bulls eye, they are inner and outer Montes Rook and the outermost ring is Montes Cordillera. The early studies says that it is an Moon's most impact basin. However, it is younger than Imbirium basin. The Multi ring features are showing that the mostly reliable rough mountain ranges with mare deposits, through this impact the Il'in crater is formed. The Il'in crater is a circular and bowl shaphed crater, it is located on the far side of the moon, it lies in the western half of Mare Orientale basin, in the central of the basin the lava is flooded with lunar mare, the Il'in crater is larger than crater Hohmann. By image processing we can identify the types of compositional variations and their relevant surface characteristics in lunar crater by using Matlab and Envi. The location map of Il'in crater is shown in Fig 2.1.

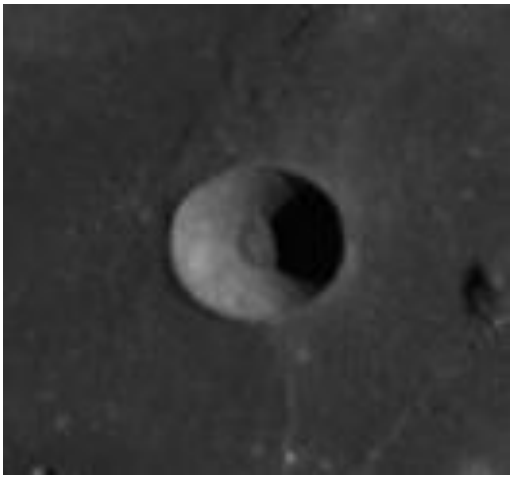

Fig 2.1. Original Picture of the Il'in crater on the far side of the moon by LRO

3. Materials and Methodology

3.1 Materials

The Moon Mineralogy Mapper (M^3) is one of the instrument from the 11 payloads in Chandrayaan-1, it is contributed to the India's first mission to moon launched on October 22, 2008 at Sriharikota on board of ISRO for a two year mission of 100km polar orbit. The M^3 with high resolution compositional maps will help in understanding the early evolution of the lunar surface. The M^3 is to characterize and map lunar surface mineralogy of lunar geologic evolution. It helps in understanding the highland crust, basaltic volcanism, impact craters. The M^3 is a high pushbroom imaging spectrometer operates in a range of 0.7 to 3.0 μm . The goals is to translate the accurate measurement of absorption features of rocks and minerals. The M^3 measurements are obtained for 640 spatial elements and 261 spectral elements. This translates to 70 m/pixel spatial resolution and 10nm spectral resolution from a nominal 100 km polar orbit for Chandrayaan-1, the field of view is 40 km in order to allow contiguous orbit-to-orbit measurements at the equator that will minimize the condition of lightning. The spectral range 0.7 to 2.6 μm capture the absorption bands for the most important lunar minerals. By the study of *[Pieters et al., (2009)]* the M^3 operates from the visible into the near- infrared of 0.42- 3.0μm where highly diagnostic mineral absorption band occurs. The M^3 has 85 contiguous bands, in the present study the satellite image of Il'in crater from M^3 data consist of 73 bands, for studying the compositional variations of surface characters the method used is Principal Component Analysis for the bands which consist of clear view of surface characters is done with Envi software and to implement the range of surface characters for the computed bands with set of rules by if-then logic through fuzzy logic method is done by Matlab software.

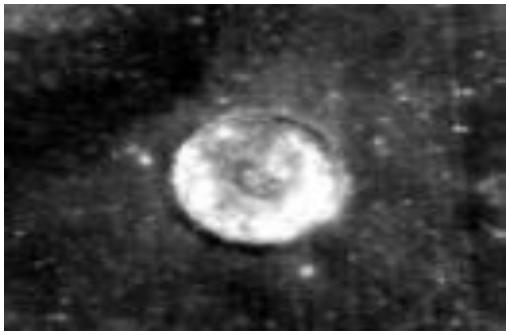

Fig3.1. Original Band Image

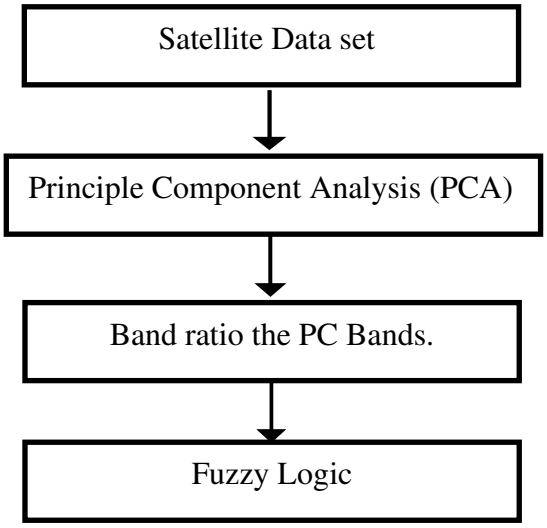
Fig3.2. PCA plot for 73 bands

3.2 Methodology



3.2.1 Principal Component Analysis (PCA)

The Principal Component Analysis is a method that converts original data into new set of data to capture the essential information. It is a linear transformation that converts multiband images to new set of image bands. In Envi the input image is computed to covariance or correlation matrix depends on the data processed, then the eigen vectors of the covariance or correlation matrix is calculated *[Rodarmal and shan., (2002)]*. In this study the satellite image consists of 73 bands, this data processed with PCA for 73 spectral bands and the PCA converted bands were band ratioed until the view of clear surface materials, the surface materials were clearly visible for 1-5 bands, from these bands it is computed as band ratio for 9 combinations the images were displayed for 9 combinations with RGB in the PCA band ratio images, the band ratio combinations are band 123, band 312, band 231, band 234, band 423, band 342, band 345, band 534 and band 453.The surface materials in red is poor in titanium, green is sensitive to iron, blue is rich in titanium as per the study of *[Shkuratov et al,2003]*. The band ratio combination did in this study based on this similar works of *[Rodarmel and Shan, (2002), R.P. Gupta et al., (2013), Mia and Fujimitsu, (2012)]*.

The image classified based on the Band ratios with RGB is given below

For 123,

R= Band2/Band 1; G= Band3/Band2; B= Band1/Band3.

For 312,

R= Band1/Band3; G= Band2/Band1; B=Band3/Band2.

For 231,

R= Band3/Band2; G= Band1/Band3; B= Band2/Band1.

For 234,

R= Band3/Band2; G= Band4/Band3; B= Band2/Band4.

For 423,

R= Band2/Band4; G= Band3/Band2; B= Band4/Band3.

For 342,

R= Band4/Band3; G= Band2/Band4; B= Band3/Band2.

For 345,

R= Band4/Band3; G= Band5/Band4; B= Band3/Band5.

For 534,

R= Band3/Band5; G= Band4/Band3; B= Band5/Band4.

For 453,

R= Band5/Band4; G= Band3/Band5; B= Band4/Band3.

3.2.2 FUZZY LOGIC:

The Fuzzy logic is to set rules for to implement the fuzzy set for the classified image. It is a set without a crisp and clearly defined boundaries, the elements contain in the fuzzy set is only with partial degree of membership. The fuzzy logic is a reasoning for generalizing yes or no as Boolean logic, if we give true the numerical value will be 1 or if we give false the numerical value be 0. In Matlab the fuzzy logic toolbox is a best method to solve the problem which allows using logic of if- then rules for systems's behaviour. This Toolbox is an execution of functions built on this software, it is used for numeric computing environment and provides tools for creating and editing fuzzy inference systems by using

Matlab. There are two types of systems in fuzzy logic as follows Fuzzy Interface System and Adaptive Neuro fuzzy Interface system. In this present study we use Fuzzy Interface System. The PCA Bands of 9 combinations were divided and classified into 3 input variables named as red, green and blue, the output is named as surface materials the input and output display range is [0, 255] using Mamdani method, this process is done by method of *[Vini, Aakanksha, Aditi, Ambika and Ankita, 2013].* The similar works of this method *[Jabari and Zhang, 2013, Afirah and Sharifah, 2016, Barrile and Bilotta, 2008].*

FIS Properties: There were three input variables named as red, green, blue. For the each input variables the properties to be classified into 1st, 2nd and 3rd combinations and the output variable will be the range of surface materials for classified band ratio images of PCA bands.

Member Functions: There will be 3 member functions for each input variables it will be classified for the band ratio of 9 combinations using fuzzy logic. The first combination for each input variables are red, green and blue, their member functions for each input variable is given as Band 123, Band 312, Band 231. The second combination of input variables for red, green, blue, their member function for each input variable is given as band 234, band 423, band 342 and the third combination for each input variables of red, green, blue, their member function for each input variables is given as band 345, band 534, band 453 and for all three input variable combinations the output is named as surface materials (i.e. it is the accuracy assessment of band ratio images) its member function is given as Minimum, Medium and Maximum as triangular form.

The parameter range of output variable,
Maximum= [175 215 255];
Medium= [75 125 175];
Minimum= [0 35 75].

For example, the fuzzy set rules based on if- then logic,
If Band 123 in red **then** it is low in titanium,
If Band 312 in green **then** it is sensitive to iron,
If Band 231 in blue **then** it is high in titanium,

For the output of maximum range of surface materials the 3 combinations with input variables with band ratios are given as

For 1st combination of maximum;

Red= Band 123; Green= Band 312; Blue= Band 231

For 2nd combination of maximum;

Red= Band 234; Green= Band 423; Blue= Band 342

For 3rd combination of maximum;

Red= Band 345; Green= Band 534; Blue= Band 453.

For the output of medium range of surface materials the 3 combinations with input variables with band ratios are given as

For 1st combination of medium;

Red= Band 312; Green= Band 123; Blue= Band 231.

For 2nd combination of medium;

Red= Band 423; Green= Band 234; Blue= Band 342

For 3rd combination of medium;

Red= Band 534; Green= Band 345; Blue= Band 453.

For the output of minimum range of surface materials the 3 combinations with input variables with band ratios are given as

For 1st combination of minimum;

Red= Band 231; Green= Band 312; Blue= Band 123.

For 2nd combination of minimum;

Red= Band 342; Green= Band 423; Blue= Band 234.

For 3rd combination of minimum;

Red= Band 453; Green= Band 534; Blue= Band 345.

Table 3.1 Input parameters

4. Results and Discussion

4.1 PCA Results

From the method of Principle Component Analysis(PCA), the satellite image bands

consist of 73 bands were evaluated into PCA bands, the surface characters is clearly visible for 1-5 bands, it is classified into 9 combinations with RGB image such as band 123, 312, 231, 234, 423, 342, 345, 534, 453 is given below from **(Fig.4.1- Fig.4.9.)** and for the accurate assessment of surface characters the 9 combinations were band ratioed with the PCA Bands and classified as a RGB images is given below from**(Fig 4.10.- Fig 4.18.)**, the compositional variations describes as the Red surface represents it is low in titanium or high in glass content, the green surface represents it is sensitive to iron, the blue surface represents high in titanium, some of the similar works based on this study *[Shkuratov et al., 2003, Lucey et al., 1998, 2000a].* Based on *[Shkuratov et al., 2003]* the surface materials were described, in the early study of *[Lucey et al, 1998]* the surface materials range and types of minerals were studied in this work.

4.2 Fuzzy Logic Results:

The fuzzy logic is a concept of reasoning with the logic of if- then rules based on the system behaviour, the fuzzy logic is to set rules for the classified images of 9 combinations band ratio PCA Bands, then the 9 combinations of band ratio PCA Bands were divided into 3 sets of combination for to satisfy the rules is set to do the fuzzy logic using mamdani method by triangular member function, the input variables were Red, Green and Blue and the member functions which describes the surface characters of each classified band ratio images as a 3 set of combinations such as the 1st combinations are 123, 312, 231, the 2^{nd} combinations are 234, 423, 342 and the 3^{rd} combinations are 345, 534, 453, the output variable is a range of surface materials and their member function such as minimum, medium and maximum, the rules set for the execution of fuzzy logic is in **(Table 3.3).** The rules set for fuzzy sets with if- then logic is given below:

For the maximum range of output the results of the fuzzy set rules for Maximum range of surface materials shown in **(Fig 4.19.).**

The rules for the **first** combination of band ratio images were set as
If the Band123 in red **then** it is low in titanium or high glass content,
If band 312 in green **then** it is sensitive in iron,
If Band 231 in blue **then** it is high in titanium.

The rules for the **second** combination of band ratio images were set as
If band 234 in red **then** it low in titanium or high glass content,
If band423 in green **then** it is sensitive to iron
If band 342 in blue **then** it is low in titanium.

The rules for the **third** combination of band ratio images were set as
If band 345 in red **then** it is low in titanium or high glass content,
If band 534 in green **then** it is sensitive to iron,
If band 453 in blue **then** it is high in titanium.

For the Medium range of output the results of the fuzzy set rules for Medium range of surface materials shown in **(Fig 4.20.)**

The rules for the **first** combination of band ratio images were set as
If band 312 in red **then** it is low in titanium,
If band123 in green **then** it is sensitive to iron,
If band 231 in blue then it is high in titanium,

The rules for the **second** combination of band ratio images were set as
If band 423 in red **then** it low in titanium or high glass content,
If band 234 in green **then** it is sensitive to iron
If band 342 in blue **then** it is low in titanium.

The rules for the **third** combination of band ratio images were set as
If band 534 in red **then** it is low in titanium or high glass content,
If band 345 in green **then** it is sensitive to iron,
If band 453 in blue **then** it is high in titanium.

For the Minimum range of output the results of the fuzzy set rules for Minimum range of surface materials shown in **(Fig 4.21.)**

The rules for the **first** combination of band ratio images were set as

If band 231 in red **then** it is low in titanium,

If band 312 in green **then** it is sensitive to iron,

If band 123 in blue then it is high in titanium,

The rules for the **second** combination of band ratio images were set as

If band 342 in red **then** it low in titanium or high glass content,

If band 423 in green **then** it is sensitive to iron

If band 234 in blue **then** it is low in titanium.

The rules for the **third** combination of band ratio images were set as

If band 43 in red **then** it is low in titanium or high glass content,

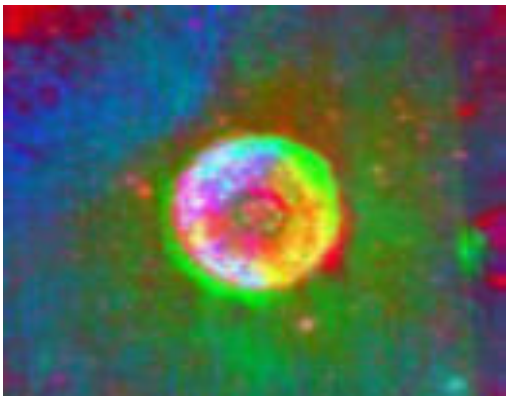
If band 534 in green **then** it is sensitive to iron,

If band 345 in blue **then** it is high in titanium.

This method is done by *[Vini, Aakanksha, Aditi, Ambika and Ankita, 2013],* from these set of rules the band ratio of PCA band images were classified by if- then logic through fuzzy logic using Matlab. The similar work of this method, the way of setting the rules with if- then logic by *[Ruby Bharti and Jitentra Kurmi, 2017].*

4.1.1 PCA Image Analysis

The PCA bands of 9 combination as RGB classified images given below,



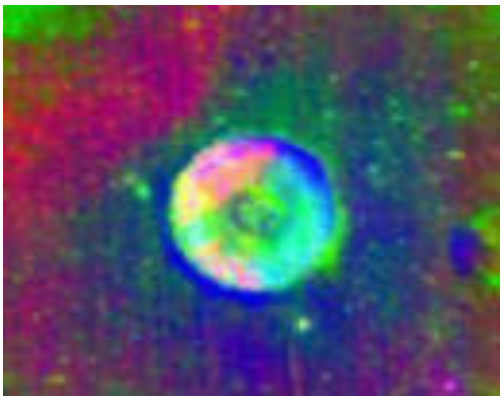


Fig 4.1. PCA 1 RGB combination of 123. **Fig 4.2. PCA 2 RGB combination of 312.**

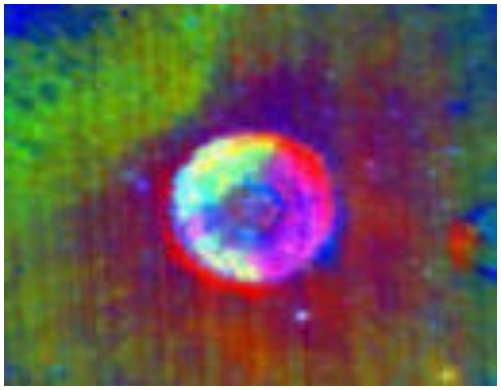

Fig 4.3. PCA 3 RGB combination of 231.

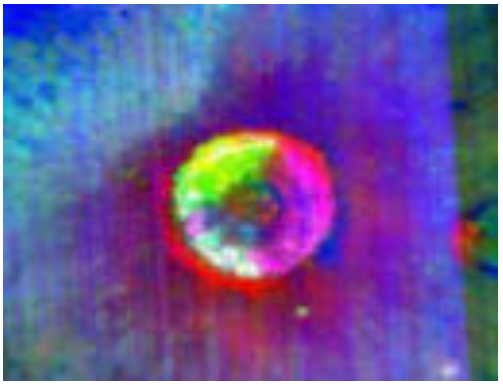

Fig 4.4. PCA 4 RGB combination of 234.

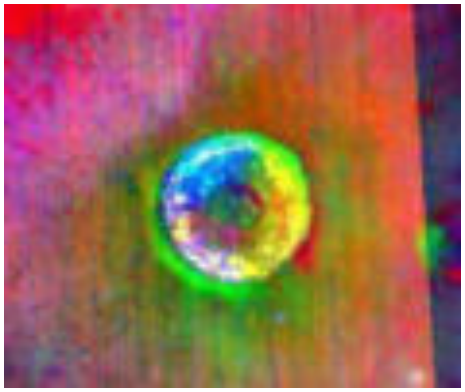

Fig 4.5. PCA 5 RGB combination of 423.

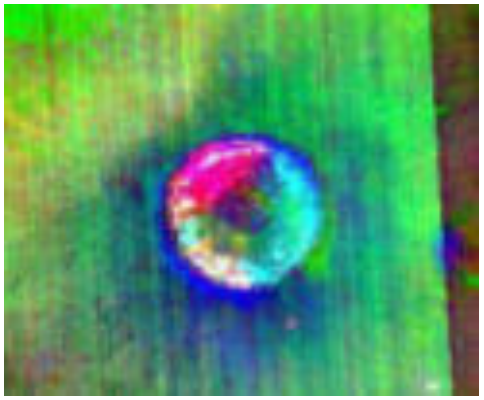

Fig 4.6. PCA 6 RGB combination of 342.

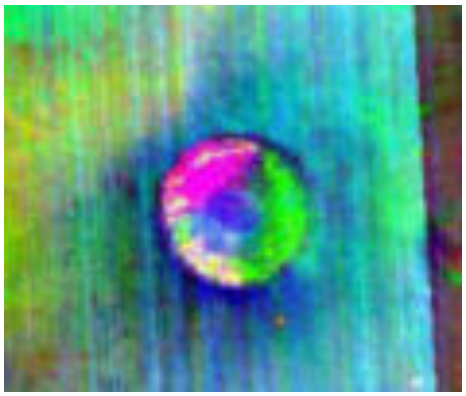

Fig 4.7. PCA 7 RGB combination of 345

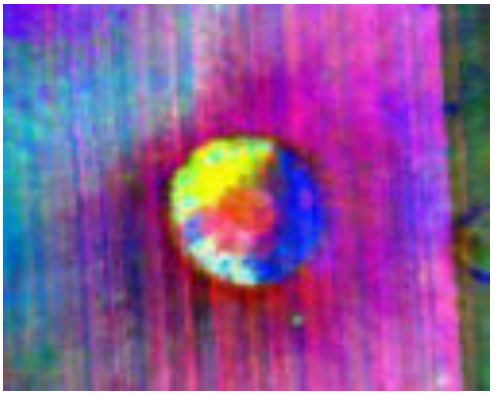

Fig 4.8. PCA 8 RGB combination of 534

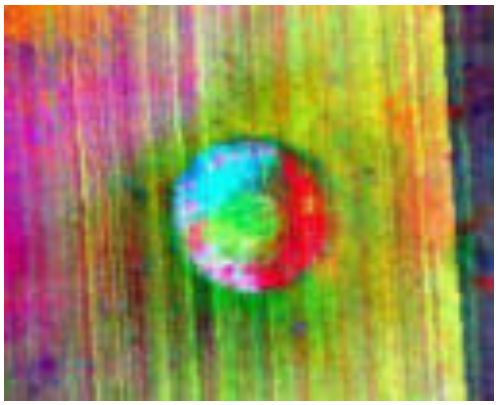

Fig 4.9. PCA 9 RGB combination of 453

4.1.2 Band Ratio PCA bands image analysis

The 9 combination of PCA band ratios with RGB classified images are given below,

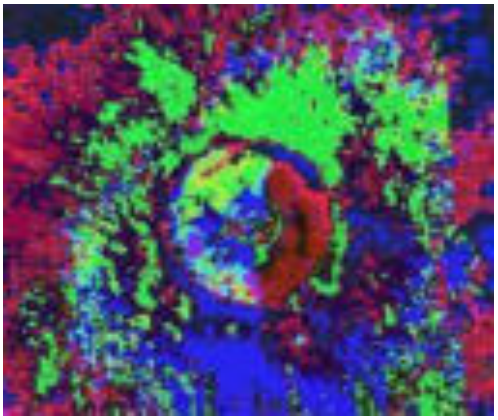

Fig 4.10. Band Ratio image for 123

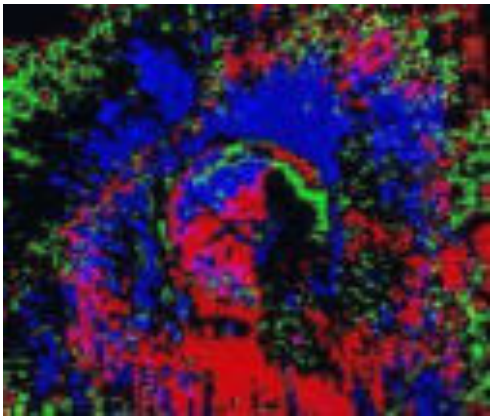

Fig 4.11. Band Ratio image for 312

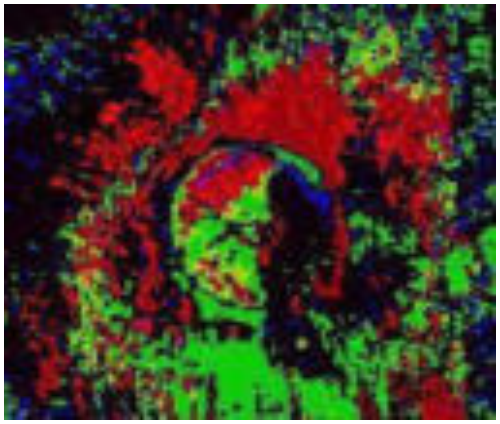

Fig 4.12. Band Ratio image for 231

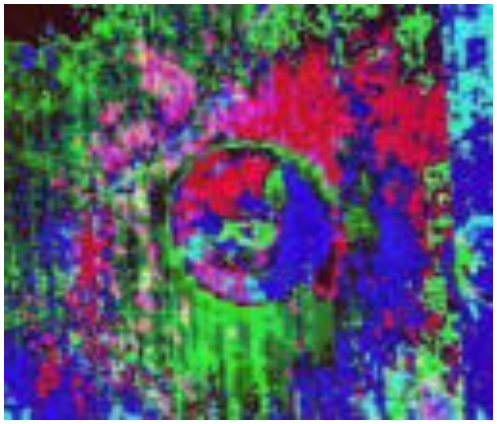

Fig 4.13. Band ratio image for 234

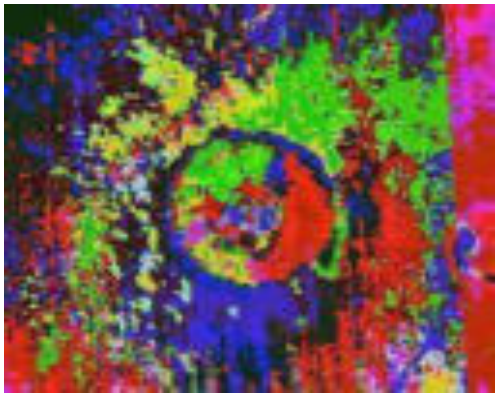

Fig 4.14. Band ratio image for 423

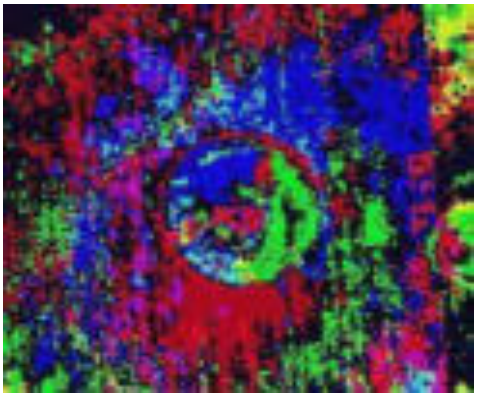

Fig 4.15. Band ratio image for 342

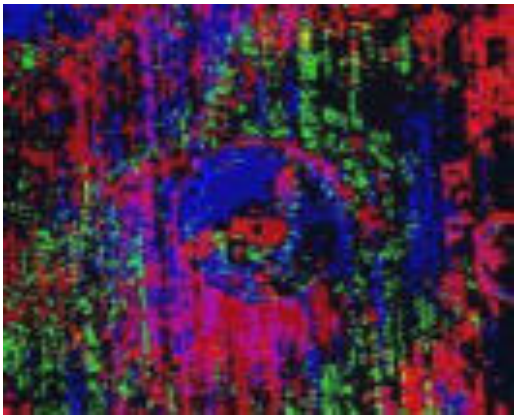

Fig 4.16. Band ratio image for 345

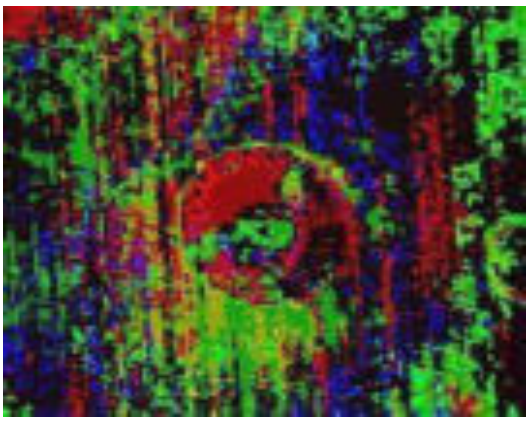

Fig 4.17. Band ratio image for 534

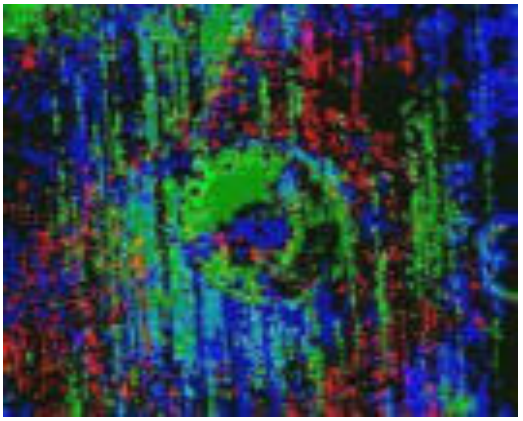

Fig 4.18. Band ratio image for 453

4.2.1 Results of Fuzzy Logic Rules:

The output results of fuzzy set rules based on if then logic is given below,

Output for Maximum:

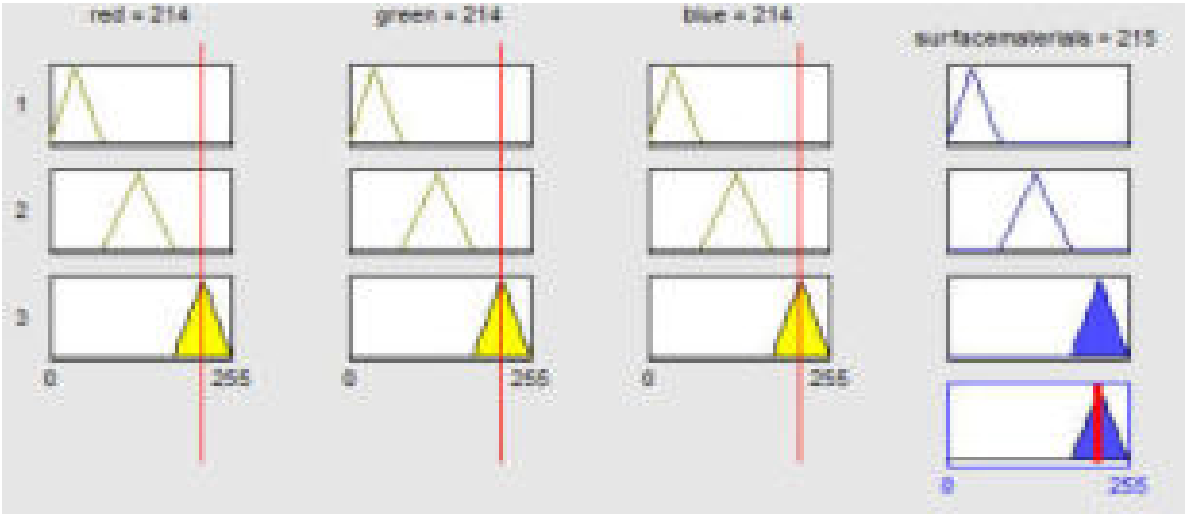

Fig 4.19. Fuzzy Logic rules this output for Maximum for 1st combination of band 123 in red, band 231 in green, band 312 in blue and for 2nd combination of band 234 in red, band 342 in green, band 423 in blue and for the 3rd combination of band 345 in red, band 453 in green, band 534 in blue.

Output for Medium:

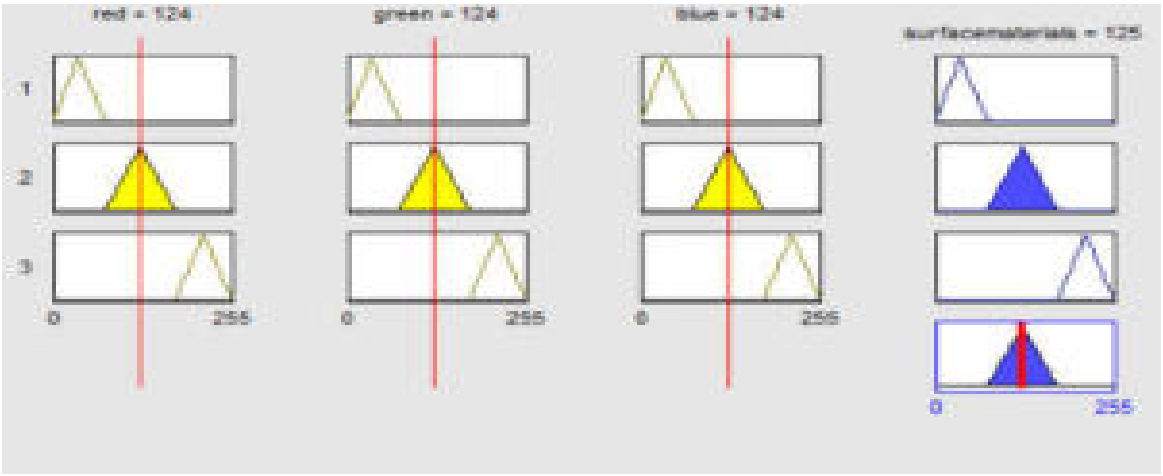

Fig 4.20. Fuzzy Logic this output is for Medium for 1st combination Band 312 in red, band 123 in green, band 231 in blue and for 2nd combination Band 423 in red, Band 234 in green,

Band 342 in blue and for 3rd combination Band 534, Band 345, Band 453.

Output for minimum:

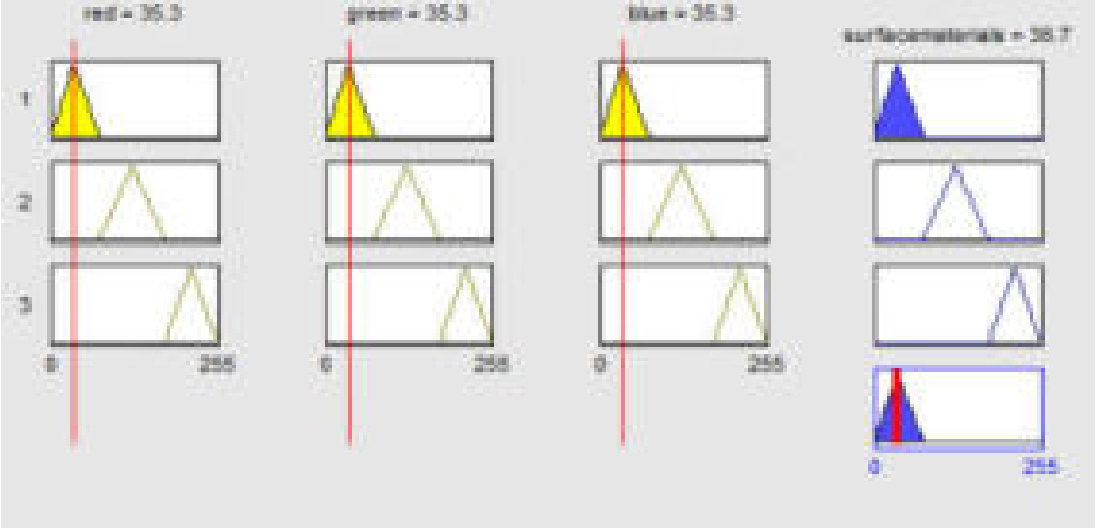

Fig 4.21. Fuzzy Logic rules this output is for minimum for 1st combination of Band 231 in red, Band 312 in green, Band 123 in blue and for the 2nd combination band 342 in red, band 423 in green, band 234 in blue and for the 3rd combination band 453 in red, and 534 in green, band 345 in blue.

5. Conclusion:

In the present study, the M^3 high resolution satellite image has been used to study the surface characters and their materials of the Orientale's Il'in crater. In addition to that, the empirical technique of PCA bands has been processed for clearly to visualize the surface characters of the crater through the band combinations of 123, 312, 231, 234, 423, 342, 345, 534, 453. Moreover, the Band ratio of PCA bands enhances the conceivable and ample vision to observe the characters of the surface in an accurate range. At finally the fuzzy logic method was adopted to highlight the perfect band combination that could be shown the agreeable presence of the surface characters and features. The rules has been set with the logic of if- then for the range of surface materials from the 3 sets of band ratio combinations, the images were classified based on fuzzy set rules. The compositional variations of surface materials describes as the Red is low in titanium or high in glass content, the green shows it

is sensitive to iron and the blue shows it is high in titanium.

5th December 2019

TO WHOM SO EVER IT MAY CONCERN

This is to certify that **Mr. O. SUDAARSAN (Reg. No : 17105122)**, S/O Mr. R. T. Ondiveeraswami, Third Year BE (ECE) student from Paavai Engineering College, Namakkal has successfully completed 2 weeks of IPT with our company from 21st November 2019 to 5th December 2019. During this period, Introduction to Verilog HDL Language and basics of Digital electronics specifically on combinational Logic design and Sequential Logic design concepts were covered. During this training, he performed very well and has gained the practical knowledge of implementation using Verilog code.

Team MSPAND wishes him very best in his future endeavors.
