

PAAVAI ENGINEERING COLLEGE

EVENTS 2014-2015

Dear Parents and Students !

Greetings from Paavai Chairman !

I am immensely happy to meet you again through this Newsletter 2014-2015. This Newsletter, now in your hands, is a record of all the academic, curricular, co-curricular and extra-curricular activities and events that have taken place in our Paavai Engineering Institutions during the academic year 2014-2015. All such events have been organized and conducted with the intention of igniting the 'Spark' in the minds of our students.

Of late, it is generally assumed that technical education is slowly losing its sheen but the fact is that it is really gaining its momentum more and more. The present prevailing situation is only a tentative setback. A nation cannot scale its heights without

science, engineering and technology.

India is progressing at a phenomenal speed. Since India is developing and getting modernized, there are vast number of facilities and opportunities, particularly in the area of manufacturing. The technical institutions are expected to bring the whole practice of manufacturing into the classroom context through skill development using trained and certified industry faculty. Then only our education would become meaningful by translating our Prime Minister Modi's slogan 'Make in India' into reality.

Now -a-days, interdisciplinary research plays a seminal role in technological development and it is the joint responsibility of every stakeholder – educationists, academics, faculty, students and so on. It gains currency in the modern scientific and technical scenario. For instance, research in nano-technology spans across an array of fields such as health, environment, agriculture, food and beverages, power generation, space technology, forensic science, electronics and communication etc. We have to think and link to find out the inter connectivity in different branches of knowledge.

It is a big credit to Paavai and we all feel proud to know that Paavai Engineering College has been accredited with 'A' Grade by National Assessment and Accreditation Council. Another milestone of Paavai Engineering College is that University Grants Commission has granted Autonomous status and Anna University, Chennai, has endorsed it.

It is evident from the variety of activities that Paavai is caring very much to cater to the needs of the students. Paavai students are exposed to listen to the experience, valuable thoughts and the success stories of great personalities, educationists, scientists, administrators, chief executives, motivators, TV anchors, writers, speakers etc.

In addition to the technical advancements and westernization of education, we have to remember our traditional pattern of education also. Real education means value-based education which includes character formation and development of all round personality. Real education aims at quantifying and measuring the importance of virtues like empathy, compassion, sacrifice, integrity and kindness- all of which play a significant role in living a meaningful life.

Unfortunately, the present day education has been reduced to the level of 'Teaching for Testing' and it is not a wholistic education. Hence, there arises an immediate need for an over-hauling, re-defining or re-designing of our educational curriculum and pedagogic pattern. Before I rap up, I would like you to remember the words of Swami Vivekananda, "Education which does not bring out the strength of character and a spirit of philanthropy is not worth the name."

I wholeheartedly congratulate the Principals, Heads of the Departments, faculty and students for the events conducted during 2014-15 and I expect your continuous support as in the past.
